Sahiwal, Punjab, Pakistan

CAREER OBJECTIVE

Motivated Computer Science student at COMSATS University Islamabad (Sahiwal Campus), currently in the 4th semester of my BS-CS program. I am seeking a summer internship position where I can apply my academic knowledge in software development, networking, and AI to real-world challenges. Eager to contribute, learn rapidly, and grow within a professional technology environment.

EDUCATION

Bachelor of Science in Computer Science (BS-CS)

2024 – Present

COMSATS University Islamabad – Sahiwal Campus

Sahiwal, Punjab, Pakistan

Semester 4 Completed | Student ID: FA24-BCS-187

Relevant Coursework:

- | | |
|--------------------------------------|---------------------------|
| ✓ Programming Fundamentals (Java) | ✓ Software Engineering |
| ✓ Object-Oriented Programming (Java) | ✓ Artificial Intelligence |
| ✓ Data Structures & Algorithms (C++) | ✓ Discrete Mathematics |
| ✓ Computer Networks (CSC275) | |
| ✓ Database Systems | |

Intermediate (FSc – Pre-Engineering)

2021 – 2023

[Punjab College Okara]

Punjab, Pakistan

Percentage / Grade: 70%

Matriculation (SSC – Science)

2019 – 2021

[Govt. M.C High School Okara]

Punjab, Pakistan

Percentage / Grade: 85%

TECHNICAL SKILLS

Languages: Python, Java, C++, HTML/CSS, SQL

Frameworks & Libs: OpenCV, MediaPipe, Scikit-Learn, NumPy

Tools & Platforms: Git & GitHub, VS Code, Cisco Packet Tracer, MS Office

Networking: TCP/IP, UDP, VLAN, Subnetting, Cisco IOS CLI

Concepts: OOP, Data Structures, Database System, Project Management (Software Engineering).

PROJECTS

Smart Intelligent Fitness Coaching & Posture Correction System

Apr 2026 – Jun 2026

Final Project – AI / Computer Vision

- Built a real-time Python application using MediaPipe and OpenCV to detect human pose landmarks.
- Implemented exercise tracking (Bicep Curls, Squats, Push-ups) with angle-based rep counting and live posture scoring (0–100%).
- Integrated pyttsx3 voice coaching engine providing personalized real-time audio feedback.
- Designed an OpenCV dashboard with live metrics, session stats, and an exercise selection menu.
- Technologies: Python 3.11, MediaPipe 0.10.9, OpenCV 4.9, NumPy, Scikit-learn, pyttsx3

Smart Flood Detection and Prevention System

May 2026 – Jun 2026

Computer Networks Course Project (CSC275)

- Designed and simulated a full IoT-based flood monitoring system using Cisco Packet Tracer.
- Built an HTML/JavaScript dashboard (Chart.js) featuring live sensor readings, automated actuator controls, and ML-based flood forecasting.
- Wrote Cisco IOS CLI configuration scripts for routers, switches, and OSPF/BGP routing protocols.
- Delivered a comprehensive 40-minute video demonstration with full project documentation.

AI/ML Group Research Presentation

Mar 2026 – May 2026

Artificial Intelligence Course

- Led a 33-slide research deck on AI Foundations, ML paradigms (Supervised/Unsupervised/RL), and mathematical formulations (Bellman equations, Q-Learning).
- Presented concepts using real-world applications, diagrams, and bilingual (English/Urdu) explanations.

INTERNSHIP / WORK EXPERIENCE

No formal work experience yet — actively seeking internship opportunities in Software Development, App Development or AI/ML.

CERTIFICATIONS & ONLINE COURSES

- Doing Software Engineering course on Coursera.
- Completed Python Course on Kaggle.
- Doing AI from ACT AI Skill Bridge PMY Programme.

CO-CURRICULAR & VOLUNTEER ACTIVITIES

- Active member of COMSATS CS Literature Society (2025-Present).
- Participated in departmental project exhibition.
- Volunteer in Student week Management Under CSS society.
